## PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience in full-stack web development and AI/ML projects. Proficient in MERN stack, Python, Java, and SQL, with a strong understanding of data structures, databases, and software engineering principles. Experienced in building secure, scalable, and data-driven applications using machine learning models.

## TECHNICAL SKILLS

**Programming Languages:** C, Java, Python, SQL  
**Web Technologies:** HTML, CSS, JavaScript, React.js  
**Backend & Databases:** Node.js, MongoDB  
**Tools & Platforms:** Git, AWS  
**AI / Machine Learning:** XGBoost, LightGBM, CNN, AutoML, SHAP

## PROJECTS

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>HealthVerse – Smart Healthcare Management System</b><br><i>MERN Stack, Machine Learning</i> <ul style="list-style-type: none"><li>– Developed an AI-powered healthcare platform using MongoDB, Express, React, and Node.js.</li><li>– Implemented machine learning models including XGBoost, LightGBM, and CNN for personalized health insights.</li><li>– Integrated AES-256 encryption to ensure secure medical data storage and transmission.</li><li>– Built predictive risk analysis features for explainable healthcare decision-making.</li></ul> | Jul 2025 – Oct 2025 |
| <b>SkillProctor – AI-Based Online Examination Portal</b><br><i>React, Node.js, MongoDB, Face API</i> <ul style="list-style-type: none"><li>– Built an AI-enabled online examination system with facial detection and behavior analysis.</li><li>– Developed full-stack functionality using React, Node.js, and MongoDB.</li><li>– Improved exam integrity through automated monitoring and alert mechanisms.</li></ul>                                                                                                                                      | Jul 2024 – Nov 2024 |
| <b>Data Visualization on STEM vs Non-STEM Profiles</b><br><i>Python, Pandas, Matplotlib, Seaborn</i> <ul style="list-style-type: none"><li>– Analyzed OKCupid dataset to compare STEM and Non-STEM representation.</li><li>– Created bar charts and proportion plots with error margins for data interpretation.</li></ul>                                                                                                                                                                                                                                  | Jan 2025 – Apr 2025 |

## INTERNSHIPS

- |                                                                                                                                                                                                                                            |                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>HIF Analytics – Data Analytics Intern</b> <ul style="list-style-type: none"><li>– Worked on extracting insights from real-world datasets using Python.</li><li>– Led a small team to coordinate analysis tasks and reporting.</li></ul> | Jul 2024 – Nov 2024 |
| <b>Webstack Academy – MERN Stack Intern</b> <ul style="list-style-type: none"><li>– Gained hands-on experience in full-stack web development using MERN stack.</li></ul>                                                                   | Feb 2024 – Apr 2024 |

## EDUCATION

- |                                                                                                     |                      |
|-----------------------------------------------------------------------------------------------------|----------------------|
| <b>National Engineering College</b><br><i>B.E. in Computer Science and Engineering — CGPA: 7.81</i> | Sept 2022 – Apr 2026 |
| <b>St. Antony's Public School</b><br><i>HSC – Biology &amp; Mathematics — Percentage: 69.6</i>      | 2021 – 2022          |

## CERTIFICATIONS

AWS Solutions Architecture Job Simulation – Forage AWS  
Cloud Technical Essentials – Coursera Database Management Systems – Scalar  
HTML & CSS – Infosys Springboard

## ACHIEVEMENTS & ACTIVITIES

Secured 3rd Prize in Paper Presentation – National Engineering College  
Joint Secretary, Computer Society of India  
Team Lead during HIF Analytics Internship
